Stochastic Evolutionary Game Dynamics - ScienceDirect Evolutionary game theory differs in two key respects: the focus is on large populations of individuals who interact at random rather than on small numbers of players; and individuals are assumed to employ simple adaptive rules rather than to engage in perfectly rational behavior.. Chapter 61 Implementation theory - ScienceDirect This chapter surveys the branch of implementation theory initiated by Maskin (1999). Results for both complete and incomplete information environments are covered.

Chapter 53 The shapley value - ScienceDirect This chapter surveys some of the literature in game theory that has emerged from Shapley's seminal paper on the Value. The survey includes both contributions which offer different interpretations of the Shapley value as well as several different ways to characterize the value axiomatically.. Behavioral Game Theory Experiments and Modeling - ScienceDirect This chapter reviews recent experimental data testing game theory and behavioral models that have been inspired to explain those data.
