We hope to give here a clear reference of the common data structures. To really learn the language, you should take the time to read other resources.

The Common Lisp Cookbook The loop macro (built-in) `loop` is the built-in macro for iteration. Its simplest form is `(loop (print "hello"))`: this will print forever. A simple iteration over a list is: `(loop for x in '(1 2 3) do (print x)) ;; => 1 2 3. NIL`. It prints what's needed but returns nil. If you want to return a list, use `collect`:. The Common Lisp Cookbook SLT is a new (published on January, 2023) plugin for the suite of JetBrains' IDEs. It uses a modified SLIME/Swank protocol to communicate with SBCL, providing IDE capabilities for Common Lisp. It has a very good user guide. At the time of writing, for its version 0.4, it supports: REPL. symbol completion.

The Common Lisp Cookbook The Common Lisp Cookbook – Files and Directories. ? ??? ? NEW: learn CLOS in videos! (50% coupon), by the Cookbook's main contributor. Learn more. ? Get the EPUB and PDF. We'll see here a handful of functions and libraries to operate on files and directories.. The Common Lisp Cookbook Learn more. CLOS is the “Common Lisp Object System”, arguably one of the most powerful object systems available in any language. Some of its features include: it is dynamic, making it a joy to work with in a Lisp REPL. For example, changing a class definition will update the existing objects, given certain rules which we have control upon.
