Appendix C: Cost Estimating Methodologies - NASA Figure C-1 shows the three basic cost estimating methods that can be used during a NASA project's life cycle: analogy, parametric, and engineering build-up (also called "grassroots"), as well as extrapolation from actuals using Earned Value Management (EVM). **Figure C-1. Use of Cost Estimating Methodologies by Phase1.. Appendix G: Cost Risk and Uncertainty Methodologies - NASA** The handbook incorporates consideration of schedule uncertainty, risk registers, historical uncertainty in input parameters, improved risk expert elicitation, and other recent areas of innovation. Concepts are developed using one consistent example throughout the Handbook.

Planning and Management > Cost Estimating - NASA This handbook describes the cost estimating process from receiving a customer request through developing ... and presenting the cost estimate to project stakeholders. Smaller programs can use the Analogy Cost Estimating methodology outlined in section 2.2 of the handbook.. **PROJECT PLANNING AND CONTROL HANDBOOK - NASA** In the Cost Estimating sections updates were made to align with the latest versions the NASA Cost Estimating Handbook and NPR 7120.5E, NASA Space Flight Program and Project Management Requirements. In the Contract and Acquisition sections updates were made to align with the current Federal Acquisition Regulations

NASA COST ESTIMATE HDBK 2002 NASA COST ESTIMATING - EverySpec **NASA COST ESTIMATING HANDBOOK (CEH) (APR 2002).**, The purpose of this handbook is to be a general reference document for the fundamental concepts and techniques used by the NASA CEC to prepare cost estimates.. **Cost Estimating Module - NASA** To introduce key cost estimating concepts and terms, including complexity factors, learning curve, non-recurring and recurring costs, and wrap factors. To introduce the use of probability as applied to parametric estimating, with an emphasis on Monte Carlo simulation and the concept of the S-curve.
