In contrast to other areas of psychological study, such as memory, language, and attention, the study of face perception was a minority interest during the early years of cognitive psychology, and the topic received little or no attention in early cognitive ...

Oxford Handbook of Face Perception | Oxford Academic The Oxford Handbook of Face Perception looks at the functional and neural mechanisms underlying the perception, representation, and interpretation of facial characteristics, such as identity, expression, eye gaze, attractiveness, personality, and race. It examines the development of these processes, their neural correlates in both human and non .... Are Faces Special? | Oxford Handbook of Face Perception - Oxford Academic Historically, several strands can be identified to the proposal that visual representations of faces are special. First, it has been suggested that infants might be born with an innate representation of the structural form of a face (Morton and Johnson, 1991). This would make faces special, because innateness is a property that clearly cannot hold for non-face objects in general: humans can ...

1 Face Perception: a Developmental Perspective - Oxford Academic Abstract. This article views face perception as the ideal case study example for understanding the deeper principles underlying human neurodevelopment. It illustrates how face perception has been one of oldest battlegrounds for resolving key issues in human development. It argues that taking a developmental approach to face perception can ....
