UNIX and Linux System Administration Handbook - pearson.de the kernel is the central government of a UNIX or Linux system. It's responsible for enforcing rules, sharing resources, and providing the core services that user processes rely on. We don't usually think too much about what the kernel is doing. That's fortunate, because even a simple command such as `cat /etc/passwd` entails a complex series. Evi Nemeth, Garth Snyder, Trent R. Hein UNIX And Linux System ...
